PROJECTS

Github Fetcher App

Utilized network calls to fetch user details via the GitHub API. The app enables users to explore GitHub profiles, repositories, and contributions, demonstrating my iOS development skills.

Movie Tracker App

Created a movie tracker app using SwiftUI, IMDb API, and CoreData for Swift Student Challenge 2024. Enables searching, tracking favorites, and personalized recommendations with sleek UI and offline support.

Jinja Ninja

Crafted a 2D adventure inspired by the Chrome Browser Dino Game, starring a dynamic Ninja. Dodge obstacles and enjoy endless excitement in this thrilling adaptation.

Full-Stack KrypticGram

Working on creating a Instagram Clone using Swift and Firebase for backend operations, and SwiftUI for app development. Building a comprehensive solution mirroring Instagram's functionality and design.

EXTRA-CURRICULAR ACTIVITIES

- Actively write blog posts (www.akhilraghav.cloud) and social media posts ([Instagram](#)), viewed by over 1k users.
- Certified with Meta iOS Developer Certification
